Video 1: We discuss an overview of the next 10 days, then dive into the specific materials & tools we'll be using.

Video 2: We cut everything out; the pattern pieces, leather, stiffeners, lining, and interfacing.

Video 3: We begin bag assembly; stiffeners are glued to the leather, and the handle & handle connector pieces will be constructed.

Video 4: We start sewing! Exterior construction will be completed, and you'll learn how to base coat & edge paint.

Video 5: The lining will be constructed; this includes slip & zipper pockets, key fob, closure, and upper lining.

Video 6: Final assembly! We'll glue the exterior to the lining, sew it in place, then close the lining of the bag. The handle & hardware will be added, and the finishing touch will be the knotted handle/handle connectors.
